

Since its inception in 2008, IMPACT has worked exclusively with children with cancer at MNJ Institute of Oncology and Regional Cancer Center, Hyderabad. The organisation started the Pediatric Cancer Unit at MNJ as a 10 bed center and has helped it grow to a 100 bed unit today (with 2 general wards, a day care center and an ICU). With the support of IMPACT, the treatment abandonment rate has dropped to 10% and cure rates increased from 15% to 40%.

With the intention of improving its operations to encompass all functions of offering complete beginning to end care and treatment, Impact has now moved to its own new premises of "Sivananda-IMPACT Pediatric Cancer Center".

Under the able guidance of our specialized oncology team led by Dr. Sudha Sinha, IMPACT aims to achieve cure rates on par with developed countries, upto 80%.

All contributions to 'IMPACT' are exempt under 80G of Income Tax Act. IMPACT is also registered for undertaking CSR activities.
